

🌸 NightBloom — A VS Code Theme by Rutvi

"When the world sleeps and your mind comes alive, NightBloom is your quiet little garden of code — soft, deep, and soothing."

🌙 About the Theme

NightBloom isn't just a theme.

It's your companion during the quiet hours. A soft whisper in the silence.

Made for dreamers, thinkers, and coders who find beauty in stillness.

With gentle purples and deep blacks, it brings focus without harshness and beauty without noise.

✦ Enhanced for Better Readability

Now featuring lighter purple colors for improved contrast and easier reading while maintaining the peaceful purple aesthetic.

🤍 From Rutvi, With Love

Hi there 🙋

I'm Rutvi — a passionate developer who believes your editor should feel like home.

NightBloom was born from those late-night moments when code felt like poetry and silence felt like music.

I hope this theme brings you a little peace, a little magic, and a lot of beautiful code.
